CAREER OBJECTIVE

Passionate and driven 3rd-year B.Tech AI & ML student at P.P. Savani University with a strong foundation in Python, Machine Learning, and front end web development. Seeking a challenging internship opportunity to apply technical skills in real-world AI & ML environments, contribute to impactful intelligent systems, and grow as a future AI & ML engineer.

EDUCATION

B.Tech in CSE (AI & ML)

P.P. Savani University, Kosamba, Surat

2023 – Present (Pursuing)

CGPA: 7.11 | SGPA: 7.96 | Specialization: AI & ML

Higher Secondary (12th) — Science Stream

J.B. & KARP Vidhya Sankul, Surat

Completed – May 2023

Board: GSEB

Secondary Schooling (10th)

J.B. & KARP Vidhya Sankul, Surat

Completed – May 2021

Board: GSEB

TECHNICAL SKILLS

Languages

Python, C, Java, R

AI & ML

Pyhon tkinter,
Numpy, panda,
Matplotlib, seaborn,
Model Training

Web Dev

HTML5, CSS3,
JavaScript,
TailwindCSS

Databases

MySQL, SQL Yog

Tools & Cloud

Git, GitHub, VS Code,
AWS, Blender

Mobile Dev

Android Studio,
Android SDK, Java

CS Fundamentals

DSA, OOP, DBMS,
Algorithms

Soft Skills

Problem Solving,
Team Collaboration,
Communication

ACADEMIC & PERSONAL PROJECTS

Database Management System | Personal Project

Nov 2024 – Apr 2025

Tech Stack: Python, Tkinter, MySQL

- Built a full-featured desktop database management application using Python Tkinter as the GUI and MySQL as the backend.
- Enabled users to perform complete CRUD operations, run custom SQL queries, and manage relational data through an intuitive interface.
- Bridged Python programming with robust database operations, demonstrating real-world data management skills.

Text-to-3D Model Generator (AI) | Hackathon Project

18 January 2026

Tech Stack: Python, OpenAI Shap-E, Blender, ML Libraries

- Developed a cutting-edge generative AI system that converts natural language text prompts into fully rendered 3D models.
- Integrated OpenAI's Shap-E architecture with Python ML libraries and Blender to produce exportable 3D assets from plain text.
- Showcased advanced generative AI capabilities at Tech Globe Fest 2.0 Hackathon (Google Developer Group, PPSU).

Smart Traffic Alert & Route Optimizer | AI Project

June 2025 – Present

Tech Stack: Python, React, TypeScript, HTML, TailwindCSS, GPS Integration, Push Notifications

- Built a full-stack AI + GPS-powered platform that monitors live traffic conditions and alerts users to congestion in real time.
- Implemented real-time GPS tracking to detect traffic hotspots within 2–3 km radius and push smart alternate route recommendations.
- Integrated push notifications that deliver alerts even when the application is not actively running, ensuring users are always informed.

CERTIFICATIONS

- AWS Academy Graduate — Cloud Foundations | Amazon Web Services | Mar 2026
- Machine Learning for Data Science Projects | IBM SkillsBuild | Sep 2025
- TechSprint Hackathon — Tech Globe Fest 2.0 | Google Developer Group, PPSU | Jan 2026
- Gen AI Study Jams | Google Developer Groups, PPSU | Jan 2025
- Data Analytics & Visualization Job Simulation | Accenture, Forage | Feb 2024

ACHIEVEMENTS & ACTIVITIES

- Hackathon Participant & Winner — Tech Globe Fest 2.0 (TechSprint), Google Developer Group, PPSU — Jan 2026.
- Built and deployed a Text-to-3D generative AI model using OpenAI's Shap-E architecture in a competitive hackathon environment.
- Developing an AI-powered real-time traffic management system integrating GPS tracking and push notification systems.
- Pursuing active focus areas: building ML models for real-world datasets, NLP pipelines with LLMs, and computer vision for image classification.

PERSONAL DETAILS

Date of Birth:	13/01/2006	Languages Known:	English (Fluent), Hindi (Fluent), Gujarati (Native)
Location:	Laskana, Surat, Gujarat
